Career Objective

Full-stack JavaScript engineer leading the technical team at WioCare, where I architect and ship an AI-powered healthcare platform in production with Next.js, React, Node.js and TypeScript. I aim to grow into a software architect role designing large-scale products and mentoring the engineers who build them.

Technical Skills

Experts: JavaScript, TypeScript, React, Next.js, HTML5, CSS3, Tailwind CSS
Comfortable: Node.js, Express.js, PostgreSQL, MongoDB, Prisma, Redis, REST APIs, JWT & RBAC, Firebase.
Familiar: Flutter, Docker, bKash, SSLCommerz, Stripe, Socket.IO, FCM, i18next.
Tools: VS Code, Git & GitHub, Postman, Docker, Firebase, Vercel, Netlify, Figma, Photoshop.
Interpersonal: Team leadership, mentoring, code review, communication, problem-solving, quick learner.

Experience

Head of Technical Team — **WioCare** — **Chattogram, BD | 10/25 - Present**

- Leading the engineering team of an AI-powered digital healthcare platform in production — task assignment, code reviews, mentoring, and clear technical direction.
- Architecting core healthcare modules: ambulance dispatch with live geo-tracking, pharmacy POS & medicine delivery, and lab booking with automated reports.
- Building scalable systems with Next.js, Node.js, Express, and TypeScript — REST APIs and JWT authentication with role-based access control (RBAC).
- Shipping real-time features (Socket.IO, Firebase Cloud Messaging) and payment gateway integrations.

Frontend Developer — **Jionex IT** — **Chattogram, BD | 02/25 - 07/26**

- Built and maintained modern web applications with React.js, Vite, Tailwind CSS, Node.js and Express.js.
- Implemented JWT authentication, role-based access control and REST API integration for secure apps.
- Used TanStack Query and Axios for efficient data fetching, with responsive mobile-friendly UI.

Projects

WioCare - AI-powered digital healthcare ecosystem (production)
Live: wiocare.com | Role: Head of Technical Team
Production healthcare platform connecting patients with ambulance, pharmacy and lab services.
Key Features:

- Ambulance dispatch with live geo-tracking and real-time status updates
- Pharmacy POS, inventory & medicine delivery, and lab booking with automated reports
- Secure JWT auth with RBAC, real-time notifications (Socket.IO, FCM), and payment integration

Technologies Used: Next.js, React, Node.js, Express.js, TypeScript, MongoDB, Firebase, Socket.IO, FCM, Stripe

MessMate - Smart mess & shared-housing management platform
GitHub: frontend / backend / member app / manager app | Livesite
Replaces a shared mess's handwritten monthly ledger — web app plus member and manager mobile apps.
Key Features:

- Daily meal planning with an 11 PM lock, plus grocery, utility-bill and bazar-duty tracking
- Automatic month-end settlement: meal rate from grocery spend, shared bills split four ways
- bKash, SSLCommerz and Stripe payments with PDF bills, email reminders and Bangla/English UI

Technologies Used: Next.js, React, TypeScript, Express, Prisma, PostgreSQL, Redis, Flutter, bKash, SSLCommerz

FixItNow - Home-services marketplace connecting customers with vetted technicians
GitHub: client / server | Livesite
Full-stack TypeScript platform where customers book vetted technicians, pay online and review jobs.
Key Features:

- Service browsing and real-time slot booking with vetted technicians
- Stripe payment integration with live booking tracking and customer reviews
- Role-based dashboards for customers, technicians and admins with JWT auth

Technologies Used: Next.js, TypeScript, React, Tailwind CSS, Node.js, Express.js, Prisma, PostgreSQL, Stripe, JWT

Education

Master of Business Administration (MBA) In Accounting-(2021) — **National University, BD**

Certificate

Complete Web Development Course from Programming Hero Batch-10, 2024

Language

English -Comfortable **Bangla** - Native **Hindi** - Communicative
